

## Class 2 Homework, 17<sup>th</sup> May

### Maths

You have worked really hard this term so the last homework of the term is a homework you can do without any writing. I would like you to spend time practising your 2, 5 and 10 times tables.

Choose one times table to start with and find different ways to practise it. When you know that table, move on to a different table.

- Try chanting "One 5 is 5, two 5s are 10, ..."
- Count in 2s, 5s or 10s on your fingers, before moving on to chanting tables while counting on your fingers.
- Play the 2 times table games in your games pack.
- Use Percy Parker songs and sing along (some are available on the Internet).
- Use Squeebles Times Tables or the free app 'Times table cloud click game' on an iPad.
- Play ICT Games Table Shooter or Topmarks Hit the Button on the Internet.
- Keep a record of which tables you find tricky and keep on practising those tables.

Please complete this task by Wednesday 22<sup>nd</sup> May.
